

# TWIN TREES LAWN SERVICE, INC.

## FERTERLIZER PROGRAM

Below are the 6 steps for fertilizing and weed control that Twin Trees will use for this season. In accordance with State regulations, we use only non-phosphorous slow-release granular fertilizer. Liquid weed control is sprayed for the 2<sup>nd</sup> & 5<sup>th</sup> applications and/or when weeds are present.

<p><b>Step 1</b></p>	<p><b>Crabgrass Preventer &amp; Lawn Fertilizer</b> Application Time: April/May This granular application promotes early greening and helps prevent crabgrass from germinating. <b>(DO NOT SPREAD GRASS SEED WITHIN 6 WEEKS BEFORE/AFTER APPLICATION)</b></p>
<p><b>Step 2</b></p>	<p><b>Weed Control</b> Application Time: April/May Liquid form post-emergent which includes dandelion &amp; broadleaf control.</p>
<p><b>Steps 3 &amp; 4</b></p>	<p><b>Turf Feed</b> Application Times: June &amp; July This granular application helps maintain a healthy green appearance. We will also spot spray weeds as needed.</p>
<p><b>Step 5</b></p>	<p><b>Weed Control</b> Application Time: August/September Liquid form broadleaf weed control. Email us to set up a crab-grass liquid treatment. (additional charges will apply)</p>
<p><b>Step 6</b></p>	<p><b>Lawn Winterizer/Fertilizer</b> Application Time: Early October This granular application is specially formulated to thicken the root system of your lawn and prepare your lawn for winter.</p>
